Productivity is key in today's global economy. Proper lubrication increases uptime and makes maintenance routines simple.

# Accessories for Lubrication Systems

**LINCOLN**  
®

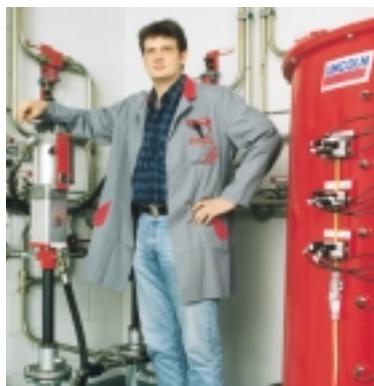

## Our Experience

Lincoln was established in 1910 and is the long-standing world leader in grease lubrication systems and equipment. Decades of business experience have provided us with a high level of expertise and know-how within the lubrication system industry. As a pioneer in the industry, we will continue being a trend-setter confidently providing our customers with the best lubrication system solutions in both price and quality.

## Our Service

Our customer service includes the consulting, engineering and planning of customer-oriented systems for all applications, the manufacturing of standard components such as pumps, metering devices or control equipment, the installation and start up of lubrication systems on site in all parts of the world, as well as the customer training, and after-market service.

## Our Quality

Our certified Quality Management System according to DIN EN ISO 9001, our expertise, consulting qualities and inventiveness, lead the way for future customer-oriented, economical and intelligent solutions.

## Our Product

Lincoln lubrication systems reduce friction and wear; thereby, decreasing maintenance costs, improving productivity, ensuring a higher level of safety and contribution to the environment.

## Our Environmental Management System

Our Environmental Management System according to DIN EN ISO 14001 and EMAS, is an integral part of our company philosophy that reflects Lincoln's future orientation.

## Our Motto

Keep in motion –  
Bleiben Sie mit uns in Bewegung!

# Electronic Pressure Switch with Digital Display

**LINCOLN**  
®

This pressure switch is equipped with 1 digital display, 2 switching outputs and 1 analog output. The switching point can be adjusted via keys and can be used for pressures between 0 and 400 bar.

Pressure Gauge 234-13101-4

These easy to service filters consist of a coarse strainer (410 micron) and a fine strainer (270 micron). They are pressure-

rated for 400 bar (5800 psi) and allow a flow rate of up to 24 liters/hour (6.3 US gal/hour).

Lubricant Solenoid Valves

Lincoln offers a variety of solenoid valves for grease, oil and air.

#### Lubricant Solenoid Valves

The depicted solenoid valves for grease (or oil) are specially designed to meet the tough requirements of grease lubrication applications.

With conventional valves, the grease has the tendency to harden within the valve, causing blockage.

## Universal Controller with SPS & Text Display

|               |  |
|---------------|--|
| part no.      | 1SS73-00000-00   |
| dimensions    | 380 x 380 x 210 mm   |
| application   | Medium-size and large systems (two-line systems, progressive systems, spray lubrication systems) |
| input voltage | 230 VAC (other voltages available)   |
| inputs        | 14, also available with analog inputs  |
| outputs       | 10   |
| text display  | 2 lines with 20 characters each  |

Standard with up to 6 monitored progressive divider valves or nozzles; up to 4 monitored two-line metering devices

## Universal Controller with Compact SPS

|               |  |
|---------------|--|
| part no.      | 1SC74-00000-00   |
| dimensions    | 380 x 380 x 210 mm   |
| application   | medium and large-sized systems with a lot of monitoring locations (two-line systems, progressive systems, spray lubrication systems) |
| input voltage | 400 VAC (other voltages available)   |
| inputs        | 16   |
| outputs       | 16   |
| text display  | 2 lines with 20 characters each  |

Complete unit with display (2 lines with 20 characters each) and ASI-bus expansion module available up to 124 inputs and 124 outputs Standard with up to 12 monitored progressive divider valves or nozzles; up to 10 monitored two-line metering devices

# Hoses, Tubes and Fittings

**LINCOLN**  
®

All necessary tubing, hoses, fittings and fastening material are available to meet your system requirements.

Tubes are available in several sizes and materials ranging from steel, stainless steel, and copper to plastic (PA). To save your time when installing your own systems, plastic tubes are even available pre-filled with grease.

Fittings are also available in several sizes, materials and series (light to heavy). For easy installation, we have special Quicklinc push-in type fittings that can be used with plastic tubes.

### Reducer KOR/RED

These fittings are used to reduce from one size of tubing to a smaller size. KOR/RED fittings must be used in conjunction with the larger size G or T fittings. E.g. to reduce from 20 to 10 mm tube, use a G20-S and a RED20/10-S.

## Quicklinc™, Push-in Type

The Lincoln logo consists of the word "LINCOLN" in a bold, blue, sans-serif font. A thick blue horizontal bar runs across the bottom of the letters, and a registered trademark symbol (®) is located at the end of the bar.

Installing lubrication systems can take a lot of time, especially when there's not much space to work with. Those problems are a thing of the past with Quicklinc™ "push-in" fittings. Great for hard-to-reach places, Quicklinc™ can cut the time it takes to install line connections in half – or more – when compared to screw-type connectors, which require the assembly of four components.

Quicklinc™ fittings from Lincoln are designed for high pressure, withstanding up to 350 bar (reinforced collar version). They are used primarily in progressive systems from the pump to the main metering device (reinforced collar version) and from the main to secondary metering devices or lube points (knurled collar version).

Note:  $M$  = metric,  $B$  = BSRT,  $C$  = CSPP,  $K$  = canonical.

## Line Connector Union, Push-in Type

The Quicklinc™ line connector union is a great way to connect two lines or to fix a broken line without replacing the whole line.

Just clean the line ends, plug them into the connector and the line is repaired.

# Lincoln's Global Distribution Network Is the Best in the Industry

In all levels of service – lubrication system evaluation, custom-engineered system installation, or the supply of top-quality products – your Lincoln distributor makes certain you always get the very best value.

**Systems House Distributors**  
Our systems house distributors offer the highest level of expertise available in the industry. They custom-design systems with the exact combination of Lincoln components you need. Then they install the system in your plant with experienced technicians or work with your personnel to make sure the job is done correctly. Each distributor stocks a full inventory of pumps, metering devices, controllers, monitors and accessories. Each continues to meet our stringent requirements for product, systems and service knowledge. From St. Louis to Singapore, Walldorf and worldwide, Lincoln's top-of-the-industry systems house distributors will be there when and where you need them.
